annual lists repair parts, special tools, test, and diagnostic equipment (TMDE), support equipment required for operation of organizational, direct support, support and depot maintenance of the Air Force.

al.

**Section II - Repair Parts List.** A list of parts authorized for use in the performance of maintenance. The list also includes parts which are removed for replacement of the authorized parts lists are composed of assembly groups including numerical sequence, with the parts in the group listed in NSN sequence, figure and item number sequence. Bulk materials are listed in NSN sequence, as the list group in Section II.

**Section III - Special Tools List.** (Not included).

**Section IV - National Stock Number and National Number Index.** A list, in ascending numerical sequence, of all National Stock numbers appearing in the listings, followed by a list, in ascending numeric sequence, of all part numbers appearing in the listings. National stock number and part numbers are cross-referenced to each other on figure and item number appearance.

### Explanation of Columns.

The following provides an explanation of the information found in the tabular listings:

**Illustration.** This column is divided as follows:

**Figure Number.** Indicates the figure number of the illustration in which the item is located.

**Item Number.** The number used to identify each item called out in the illustration.

**Source, Maintenance, and Recoverability.**

**Source Code.** Source codes are assigned to each item to indicate its source of supply.

PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for support purposes because essentiality requires that a minimum quantity be available in the supply systems.
PC	Item procured and stocked for support purposes otherwise would be coded PA because it is deteriorative in nature.
PD	Support item, excluding test equipment, procured for initial outfitting and stocked for subsequent or additional initial outfittings. Not subject to replenishment.
PE	Support equipment procured and stocked for initial issue or outfitting to support maintenance repair activities.
PF	Support equipment which was stocked but which will be replaced when procured on demand.
PG	Item procured and stocked to provide sustained support for the life of the equipment. It is applied to items peculiar to the equipment which are of probable discontinuance or of production facilities, where it is uneconomical to reproduce at a reasonable time.
KD	An item of a depot organization and not purchased separately, defined as a kit that is required at the time of repair.
KF	An item of a maintenance organization purchased separately, defined as a kit that can be replaced at intermediate levels of repair.
KB	Item included in both repair kit and a maintenance kit.
MO	Item to be manufactured by the manufacturer.

### Definition

Item to be manufactured or fabricated at the depot support maintenance level.

Item to be assembled at organizational level.

Item to be assembled at direct support maintenance level.

Item to be assembled at general support maintenance level.

Item to be assembled at depot maintenance level.

Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.

Item is not procured or stocked. If not available through salvage, requisition.

Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number.

A support item that is not stocked. When required, item will be procured through normal supply channels.

### NOTE

*Annihilation or salvage may be used as a source of supply for any items source coded above except those coded XA or XD.*

**(b) Maintenance Code.** Maintenance codes assigned to indicate the levels of maintenance authorized to use and repair support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

**(a)** The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the item. The maintenance code entered in the fourth position will indicate one of the following

### Code

- |   |  |
|---|--|
| H | Support item is removed, replaced, and repaired at the general support level.  |
| D | Support items that are removed, replaced, used at depot, mobilized, or repaired by specialized repair activity only. |

**(b)** The maintenance code entered in the fourth position indicates whether the item is repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). The fourth position will contain one of the following maintenance codes:

### Code

### Application/Explanation

- |   |   |
|---|---|
| O | The lowest maintenance level capable of complete repair of the support item is organizational level.  |
| F | The lowest maintenance level capable of complete repair of the support item is direct support level.  |
| H | The lowest maintenance level capable of complete repair of the support item is general support level.   |
| D | The lowest maintenance level capable of complete repair of the support item is depot level.   |
| L | Repair restricted to design. Specialized Repair Activity.   |
| Z | Nonrepairable. No repair is authorized.   |
| B | No repair is authorized. The item is to be reconditioned by adjusting, lubricating, etc., at the user level. No parts or tools are procured for the maintenance of this item. |

**(3) Recoverability Code.** Recoverability codes are assigned to support items to indicate disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows:

### Recoverability

reparable item. Repair, condemnation, and disposal not authorized below depot/specialized repair activity level.

Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.

**Stock Number.** Indicates the stock number assigned to the item and used for requisitioning purposes.

**Part Number.** Indicates the primary number of the manufacturer which controls the design characteristics of the item by means of its engineering drawings, specifications, standards, and section requirements to identify an item or items.

#### NOTE

*When a stock numbered item is requisitioned, the repair part received may have a different part number than the part being replaced.*

**Federal Supply Code for Manufacturer.** The FSCM is a 5-digit numeric code listed in 48 CFR 101-11.6-708-42 which is used to identify the manufacturer, distributor, or Government agency,

**Description.** Indicates the Federal item number, and, if required, a minimum description to identify the item. Items that are included in kits are listed below the name of the kit or set and the quantity of each item in the kit or set is listed in the quantity incorporated in unit column. If the part to be used differs between the two numbers of the same model, the effective date numbers are shown as the last line of the description. In the Special Tools List, the initial issue (BOI) appears as the last line in the description for each special tool, TMDE, and support equipment. When density of equipments supported

is requisitioned.

#### **h. Quantity Incorporated in Unit.**

the quantity of the item used in the breakdown on the illustration figure, which is prepared by functional group, subfunctional group, or assembly. A "V" appearing in this column indicates that no specific quantity is applicable (e.g., shims, spacers, etc.).

#### **4. Special Information.**

**a.** Repair parts kits and gasket sets are shown in the last entries in the repair parts listing. The illustration figure in which its parts are listed as repair parts are listed at the end of the repair parts listing in the last figure containing parts of the kit.

**b.** Usable on codes are shown in the description column. Uncoded items are applicable to all items. Identification of the usable on codes used in the listing are:

CODE	Used On
CZD	F60T-2
DUC	F60T-2A

**c.** The following publications pertain to the engine and its components.

TM 5-4120-357-14 Operator, Organizational, Direct Support and Support Maintenance Manual.

#### **5. How to Locate Repair Parts.**

**a. When National Stock Number is Unknown:**

**(1) First.** Using the table of contents to determine the assembly group within which the repair part belongs. This necessarily means that illustrations are prepared for assembly groups and listings are divided into the same groups.

**(2) Second.** Find the illustration number of the assembly group to which the repair part belongs.

**(3) Third.** Identify the repair part number in the illustration and note the illustration figure and item number of the repair part.

**(4) Fourth.** Using the Repair Parts Listing, find the figure and item number noted on the illustration.

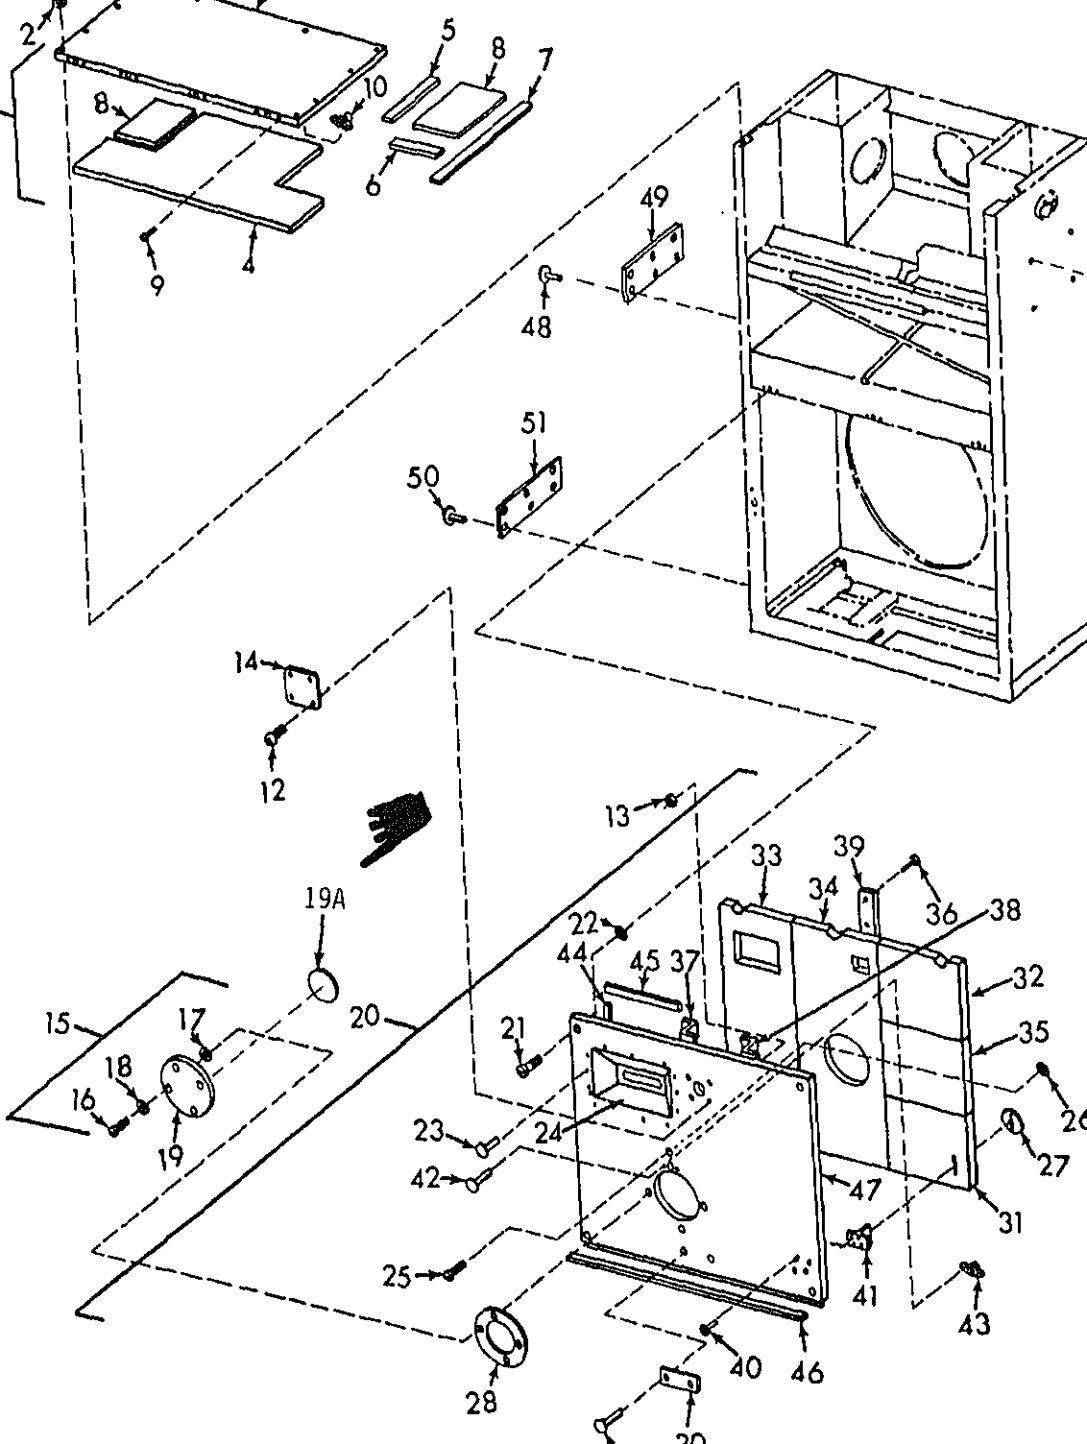

*When National Stock Number or Part Number is Known.*

**1) First.** Using the Index of National Stock Numbers and Part Numbers, find the pertinent national stock number. This index is in ascending sequence followed by a list of part numbers in alphanumeric sequence, cross-referenced by illustration figure number and item number.

**2) Second.** After finding the figure and item number, locate the figure and item number in the parts list.

## **6. Abbreviations.**

line 20

Ordered a gasket, item 19 on figure B-16 by NSN 2910-00-762- I got a gasket but it doesn't. Supply says I got what I ordered, so the NSN is wrong. Please give me a good NSN.
